

STATIONERY MANAGEMENT SYSTEM

The relationship between the tables is displayed as a **schemas**

1. **Customer** (CustomerID, FullName, CusAddress, PhoneNumber, DateOfBirth, Revenue, RegistrationDate)

The Customer relation includes attributes such as the customer ID, full name, address, phone number, date of birth, registration date, and revenue (total value of this member's invoices).

2. **Staff**(StaffID, FullName,PhoneNumber,StartDate).

The staff relation records the staff's full name, date of employment, and contact phone number.

3. **Products**(ProductID, ProductName, UniTofMeasure, CountryOfOrigin, Price).

Each product has a unique product ID, a name, a unit of measure, a country of origin, and a price.

4. **Invoice** (InvoiceID, InvoiceDate, CustomerID, StaffID, InvoiceValue).

When purchasing, each customer receives an invoice, which includes the invoice number, purchase date, the salesperson, the total invoice value, and the customer ID.

5. **InvoiceDetails**(InvoiceID, ProductID, Quantity)

The Invoice Details relation describes the products included in each invoice and their respective quantities.

STAFF
